TUTORIAL

TSCATS *Complete*TM
Print, Email, Save Results

TSCATS *Complete*[™] is a powerful resource providing access to ALL ~29,000 unpublished, non-confidential chemical testing result submissions to the U.S Environmental Protection Agency under several sections of the Toxic Substances Control Act (TSCA). Covering a multitude of chemicals, it provides the most comprehensive compilation of TSCA Test Submissions anywhere. In this tutorial, we will look at how to **Print**, **Email**, and **Save** results from your TSCATS *Complete* search.

Welcome to the ToxPlanet System

Our products have been designed to provide fast, easy, and intuitive access to a collection containing millions of documents covering over 1,000,000 unique substances. This page is intended to give you a quick overview of how our system works.

The ToxPlanet products can be searched using seven different **Search Modes**. Select from the left search panel to switch between **Search Modes**.

ListEXPERT - List View

The EXPERTIndex™ Search (a.k.a. - an EI Search) searches our 6 Million Term Index and is the quickest way to find the information you are seeking. It can be searched three different ways:

Starts With searches will return results on substances whose name starts with the text you enter. For example, a *Starts With* search on "Dinitro" will return all

To search the TSCATS *Complete* collection, start by clicking the **TSCATS *Complete™ Advanced*** button on the left side of the screen. This brings up a search box which allows you to conduct field-specific searching. The **Search Field** box allows you to search by “Title”, “Abstract”, “Authors”, “Corporate Authors”, “Supplemental Notes”, or “NTIS Issue Number”. The “Title” option is initially displayed as it is the default search option.
